Kochin, Kerala / vigneshparamasivam89@gmail.com / +91 9886324034

---

## Summary

Results-driven UI Developer and Technical Project Lead with 13+ years of experience in frontend development, team leadership, and delivering web-based applications using modern frameworks. Adept at translating business requirements into user-focused design solutions. After a 4-year break due to a successful post-renal transplant, I am actively seeking remote opportunities and contributing with renewed energy and focus. Currently upskilling in Data Analytics with tools like Excel, SQL, Python, and Power BI.

## Experience

### Data Analyst

Internship Student, Aluva, Kerala

05/2025 - Present

Currently pursuing a part-time Data Analytics internship focused on developing real-world problem-solving skills through structured data projects. Actively gaining hands-on experience with core analytics tools and workflows, including:

Excel – Advanced formulas, pivot tables, dashboards

Power BI – Data modeling, interactive reports, DAX

Python – Data manipulation with Pandas, NumPy, and Matplotlib

SQL – Querying, joins, filtering, data extraction

Data Cleaning & Visualization – Exploratory data analysis and insight generation

Collaborating remotely with mentors and teams on use-case-driven tasks, building a strong foundation in data storytelling, business intelligence, and reporting.

### ZIYA ACADEMY LLP

Project Manager | Scrum Master | Agile Strategist, Aluva, Kerala

05/2025 - 07/2025

Spearheaded end-to-end development of a Social Media Task & Analytics Platform used by 1000+ users.

Planned and architected the full project flow of Ziya's mobile Attendance Application, including an integrated HR dashboard.

Managing all technical planning across departments for future product rollouts and internal systems.

Leading the revamp of Ziya Academy's HTML/CSS-based website to a Next.js architecture to improve performance and Google SEO.

Serving as the sole technical lead overseeing cross-functional teams in Python, MERN, React, Flutter, UI/UX, Testing, Digital Marketing, and Cybersecurity.

Responsible for sprint planning, task delegation, and technical decision-making for all ongoing and upcoming projects.

## **Simelabs - Digital, Robotics, Mobility, IoT**

Senior Software Engineer / Team Lead, Kochin, Kerala

09/2019 - 08/2021

Delivered multiple Angular-based projects independently, both for internal solutions and external clients, ensuring all deliverables met quality benchmarks and were delivered on time.

Played a dual role as a hands-on developer and team lead, actively guiding junior developers in Angular architecture, UI implementation, and task estimation.

Recognized by clients for clean, scalable workflows—leading to additional project allocations and junior developers being placed under my leadership for delivery expansion.

Streamlined the development process by introducing reusable component libraries and best practices in version control, enhancing team efficiency.

Conducted regular code reviews, client demos, and sprint retrospectives, improving transparency and cycle time.

## **Augusta Hitech Soft Solutions**

Senior Software Developer, Coimbatore, Tamilnadu

05/2017 - 10/2019

Worked across multiple web platforms and projects, contributing both as an individual contributor and as a team lead. Delivered scalable, responsive applications while collaborating with clients from the US and Hyderabad.

Led a team of 3 developers while also mentoring and training new joiners on frontend best practices and frameworks.

Independently handled multiple web projects end-to-end, ensuring timely delivery and quality assurance.

Collaborated directly with international and regional clients for requirement gathering, progress updates, and deployment alignment.

Tech Stack:

Frontend: HTML, CSS, JavaScript, Bootstrap, SCSS, Angular

CMS & Integration: WordPress

Streamlined project workflows and introduced reusable component structures that enhanced team efficiency and UI consistency.

## **Xpetize Technology Solutions**

UI Team Lead – Deployed at Tech Mahindra, Bangalore, India

11/2017 - 01/2019

Led a cross-functional UI development team of 7 engineers at Tech Mahindra for the UK-based telecom client 3UK Mobile.

Acted as the primary liaison between offshore development teams and the UK client-side UI/UX stakeholders, ensuring seamless delivery of enterprise-grade mobile and web applications.

Spearheaded sprint planning, daily standups, and client demos while balancing internal team priorities and external expectations.

Collaborated with distributed QA, backend, and business teams to deliver scalable and responsive Angular applications used by thousands of end users.

Improved frontend delivery timelines by 25% through refined planning and early issue detection.

Maintained code quality and consistency by implementing peer reviews, UI testing practices, and performance checks.

## **Anmeda Systems Private Limited**

UI Developer / UI/UX Designer, Bangalore, India

01/2014 - 02/2015

Worked independently as a full-cycle UI Developer and UI/UX Designer, managing project planning, execution, and client communications across multiple locations.

Gathered client requirements and translated them into responsive, user-friendly interface designs for both internal systems and client products.

Designed and developed the official Anmeda Systems website, handling layout structure, mobile responsiveness, and deployment.

Created UI/UX frameworks for AHU (Air Handling Unit) systems across various projects, focusing on usability, visual clarity, and modular design.

Frequently worked onsite at client locations in Bangalore and Hyderabad, acting as the sole UI resource and point of contact.

Delivered polished, scalable web interfaces using modern HTML, CSS, JavaScript, and design tools, with a strong emphasis on user experience.

## **Mindbells Technologies**

Web Developer / Team Coordinator (Entry-Level Role), Bangalore, India

11/2012 - 12/2013

Started career as a web developer and quickly grew into a multi-functional role that blended technical execution with team coordination and operational support.

Acquired hands-on expertise in HTML, CSS, JavaScript, jQuery, WordPress, and UI/UX design, assisting in various website development projects under senior mentorship.

Within 6 months, began independently delivering 5–6 client websites with guidance, handling layout, responsiveness, CMS integration, and client feedback.

Worked onsite at client locations instead of the office, enabling direct client communication and real-world project exposure early in career.

Took on additional in-office responsibilities, including:

Overseeing cleaning staff workflows and ensuring workspace hygiene

Supporting HR operations such as onboarding guidance and team setup

Coordinating between teams, assisting in internal staff management, and maintaining smooth communication across departments

Gained early leadership and people-management experience while contributing to technical project delivery.
